### Contents

***Single and multiple presence statistics for bridge live load based on weigh-in-motion data***

E. L. PORTELA, R. M. TEIXEIRA, T. N. BITTENCOURT and H. NASSIF

1163

***Effect of NaOH concentration and curing regime on geopolymer***

C. N. LIVI and W. L. REPETTE

1174

***Non-destructive ultrasonic tomography for concrete pavement evaluation: signal processing and image analysis of crucial parameters***

L. S. SALLES, J. T. BALBO and L. KHAZANOVICH

1182

***Rollover stability of precast concrete beams supported by elastomeric bearing pads***

P. A. KRAHL, R. CARRAZEDO and M. K. EL DEBS

1192

***Computational modeling for predicting corrosion initiation in reinforced concrete structures***

W. K. DOMINICINI and J. L. CALMON

1205

***Behaviour under cyclic loading of strengthened beams***

A. P. R. VAZ, I. A. E. SHEHATA, L. C. D. SHEHATA and R. B. GOMES

1245

***Compressive strength of masonry constructed with high strength concrete blocks***

E. S. FORTES, G. A. PARSEKIAN, J. S. CAMACHO and F. S. FONSECA

1273

***Evaluation of coal fly ash in cementitious matrices***

D. ALTHEMAN, G. C. FERREIRA, M. MONTINI, J. B. GALLO and A. I. B. C. ROCHA

1320

***B-WIM systems application on reinforced concrete bridge structural assessment and highway traffic characterization***

P. JUNGES, R. C. A. PINTO and L. F. FADEL MIGUEL

1338

***Self-supporting tests in lattice joists subject to negative bending***

I. S. STORCH, J. G. S. DOBELIN, L. C. BATALHA and A. L. SARTORTI
