### Low-rise structures in reinforced concrete: approximation of material nonlinearity for global stability analysis

L. M. MOREIRA and C. H. MARTINS

### Numerical approach about the effect of the corrosion on the mechanical capacity of the reinforced concrete beams considering material nonlinear models

G. P. PELLIZZER, E. D. LEONEL and C. G. NOGUEIRA

### Dynamic characterization of a heritage construction from 19<sup>th</sup> century

F. BRANDÃO, E. MESQUITA, A. DIÓGENES, P. ANTUNES and H. VARUM

### Fresh and hardened properties of self-compacting concrete modified with lightweight and recycled aggregates

A. F. ANGELIN, R. C. CECCHE LINTZ and L. A. G. BARBOSA

### Attenuation of sound radiation in concrete structure through the reduction of mechanical vibration

R. V. DE HOLANDA, M. A. V. DUARTE, M. A. B. C. BADAN, J. L. DE O. PENA and R. C. ROSA

### Optimization of structural brickwork laying joints in concrete blocks

M. V. S. CAVALCANTI, A. M. X. FRANCISCO, D. M. RODRIGUES and D. G. SILVA

### Balance emissions and CO<sub>2</sub> uptake in concrete structures: simulation based on the cement content and type

E. F. FELIX and E. POSSAN

### Combined axial and flexural loads in short reinforced concrete columns in fire: ultimate limit state curves using 500 °C isotherm method

J. S. SUAZNABAR and V. P. SILVA

### Physical and geometrical non-linear behavior of precast beams on elastomeric supports

M. T. S. A. CARDOSO and M. C. V. LIMA

### Study of design methodologies of steel column bases

I. PIANA and A. F. G. CALENZANI
