

Volume 11, Number 2

April, 2018

ISSN 1983-4195

Modelling of fracture problems in quasi-brittle materials by the E-FEM

C. Z. S. MARASCA, E. BITTENCOURT
and V. M. R. D. BESSA

Experimental study of solid RC slabs strengthened on the upper surface

C. O. CAMPOS, L. M. TRAUTWEIN, R. B. GOMES
and G. MELO

Stiffness plasticity degradation of masonry mortar under compression: preliminary results

G. MOHAMAD, F. S. FONSECA, A. T. VERMELTOORT
and A. LUBECK

About the use of semi-continuity to remove fireproof coatings in simply supported composite steel and concrete beams

L. C. ROMAGNOLI and V. P. SILVA

Ultimate flexural strength of prestressed concrete beams: validation and model error evaluation

M. W. MOURA, M. V. REAL and D. D. LORIGGIO

Lateral distortional buckling of cellular composite-beams

A. D. PIASSI, J. V. DIAS, A. F. G. CALENZANI
and F. C. C. MENANDRO

The collapse of Real Class building

R. J. C. RIBEIRO and D. R. C. OLIVEIRA

Application of tuned-mass dampers to the control of floor vibrations

G. M. ALMEIDA and C. E. N. MAZZILLI

Effect of mixing method on the mini-slump spread of Portland cement pastes

J. S. RAUCCI, R. T. CECEL, R. C. O. ROMANO, R. G. PILEGGI
and V. M. JOHN

Punching shear resistance of reinforced concrete footings: evaluation of design codes

D. F. A. SANTOS, A. F. LIMA NETO and M. P. FERREIRA
