

Volume 12, Number 2

April, 2019

ISSN 1983-4195

Contents

Determination of the optimal replacement content of Portland cement by stone powder using particle packing methods and analysis of the influence of the excess water on the consistency of pastes

H. F. CAMPOS, T. M. S. ROCHA, G. C. REUS, N. S. KLEIN and J. MARQUES FILHO

Analyses of reinforced concrete beams strengthened with CFRP under bending: theoretical and computational approaches

A. S. C. SILVA and A. A. BANDEIRA

Study of epoxy composites and sisal fibers as reinforcement of reinforced concrete structure

H. M. FRANCKLIN, L. A. C. MOTTA, J. CUNHA, A. C. SANTOS and M. V. LANDIM

Experimental studies of short concrete reinforced steel fiber beams under bending

H. L. HERSCOVICI, D. ROEHL and E. de S. SÁNCHEZ FILHO

Dynamic analysis of a concrete chimney considering the aerodynamic damping

H. CARVALHO, G. QUEIROZ, P. M. L. VILELA and R. H. FAKURY

Experimental analysis of eccentrically loaded reinforced concrete columns with an added jacket of self-compacting concrete

J. P. VIRGENS, R. B. GOMES, L. M. TRAUTWEIN, G. N. GUIMARÃES and A. P. R. VAZ

Experimental analysis of bolts employed as shear connectors in circular concrete-filled tube columns

E. M. XAVIER, J. G. R. NETO, A. M. C. SARMANHO, L. ROQUETE and L. G. C. De PAULA

Effects of using chemical admixture with nanosilica in the consistency and mechanical strength of concrete

T. F. CAMPOS NETO and A. L. B. GEYER

An efficient mechanical-probabilistic approach for the collapse modelling of RC structures

K. O. COELHO, E. D. LEONEL and J. FLÓREZ-LÓPEZ

Effect of temperature gradients on the behaviour of jointed plain concrete pavements

P. B. TRUJILLO and M. A. S. GUERRERO

Analysis of the global second-order effects on irregular reinforced concrete structures using the natural period of vibration

F. F. LEITÃO, G. H. SIQUEIRA, L. C. M. VIEIRA JR. and S. J. C. ALMEIDA

Experimental and numerical evaluation of mortar specimens shape and size influence on compression tests

D. F. A. CAPRARO, A. P. B. CAPRARO, M. A. ARGENTA and M. H. F. MEDEIROS
