Contents

Nonlinear numerical analysis of composite slabs with steel decking

A. R. SILVA and P. B. SILVA

Nonlinear static analysis of a pile-supported wharf

E. ZACCHEI, P. H. C. LYRA and F. R. STUCCHI

Experimental study of reinforced masonry beams

J. S. CAMACHO, L. F. CONTADINI and G. A. PARSEKIAN

Floors number influence on the instability parameter of reinforced concrete frame-braced buildings

R. J. ELLWANGER

Structural models for analysis of reinforced concrete frame buildings with masonry infills

G. M. S. ALVA and G. A. MONTANDON

Reliability of reinforced concrete beams designed in accordance with Brazilian code NBR-6118:2014

M. SCHERER, I. B. MORSCH and M. V. REAL

Study of the influence of compressive strength concrete on columns during the design of a multi-floor building

G. M. FREGONEZI, W. W. WUTZOW and R. D. VANDERLEI

Assessment of concrete anisotropy by means of compression and indirect tensile tests

L. E. KOSTESKI, E. MARANGON and J. D. RIERA

Experimental evaluation on the structural behavior of truss shear connectors in composite steel-concrete beams

W. C. S. BARBOSA, L. M. BEZERRA, L. CHATER and O. R. O. CAVALCANTE

About the use of semi-continuity in simply supported composite steel and concrete beams, to remove fireproof coatings for standard-fire resistance requirement of less than 30 minutes

L. C. ROMAGNOLI and V. P. SILVA

Contribution to hierarchical modeling in tunnel design practice

B. S. DZIALOSZYNSKI and F. R. STUCCHI

Comparative analysis of normative provisions for seismic design and detailing of reinforced concrete structures

R. A. RODRIGUES, C. E. N. MAZZILLI and T. N. BITTENCOURT
