Contents

Six pile caps reinforced concrete: numerical simulation and design by the strut and tie method
D. S. OLIVEIRA, R. BARROS and J. S. GIONGO

Rheological behavior study of plastic shrinkage and cracking of self-compacting concrete mortars
L. S. GIROTTO, M. P. BARBOSA and G. F. MACIEL

An algorithm for the automatic design of concrete shell reinforcement
A. B. COLOMBO, J. C. DELLA BELLA and T. N. BITTENCOURT

Evaluation of deflection in reinforced concrete structures using damage mechanics
J. J. C. Pituba and R. G. Delalibera

Simplified modelling of cracking and collapse process on frames and arches of reinforced concrete
D. L. N. F. AMORIM, S. P. B. PROENÇA and J. FLÓREZ-LÓPEZ

Bond steel-concrete: simulation analysis of the pull-out tests and APULOT using the program ATENA
A. J. TAVARES, M. P. BARBOSA, T. N. BITTENCOURT and M. LORRAIN

Analysis of slim floor beams in fire: emphasis on the concrete constitutive models
F. M. ROCHA and J. MUNAIAR NETO
