

Volume 4, Number 5

December, 2011

ISSN 1983-4195

Contents

Synthesis of calcium silicate hydrate/polymer complexes

F. PELISSER, P. J. P. GLEIZE and M. PETERSON

Numerical and experimental analysis of the displacements evolution of reinforced concrete beams under repeated cyclic loads

J. OLIVEIRA FILHO, G. M. S. ALVA, R. M. F. CANHA and A. L. H. C. EL DEBS

Theoretical model for predicting the compressive strength of reinforced masonry

R. F. SILVA, J. S. CAMACHO and R. O. RODRIGUES

Specific mass and water absorption from concrete manufactured with alternate aggregates

E. C. ARAUJO and F. M. DIAS

The shear strength of steel fiber-reinforced concrete beams

A. L. MORENO JUNIOR and A. P. VEDOATO

Determination of modulus of elasticity of concrete from the acoustic response

H. J. F. DIÓGENES, L. C. COSSOLINO, A. H. A. PEREIRA, M. K. EL DEBS and A. L. H. C. EL DEBS

Development of artificial neural networks for interpreting ultrasonic pulse velocity tests in concrete

A. LORENZI, L. C. P. SILVA FILHO and J. L. CAMPAGNOLO

Contribution to the obtainment of concrete elastic modulus using micromechanics modeling

A. H. BARBOSA, P. A. LOPEZ-YANEZ and A. M. P. CARNEIRO
